

## Fellowships and Scholarships for ASME Students

- The Cheatham-White Scholarship which is a fully-funded four-year program. This one does require a nomination from your high school. <https://www.ncat.edu/admissions/financial-aid/aid/scholarships/cheatham-white-scholarship.html>
- If Kristen has already applied to A&T as of November 1st, here is the Dowdy Scholars Program, which is a near-full-ride program for all four years. <https://www.ncat.edu/academics/honors/dowdy/index.html>
- This is the American Meteorological Society (AMS) Freshman Undergraduate Scholarship for high school seniors matriculating in 2020. Applications close in February. <https://www.ametsoc.org/index.cfm/ams/information-for/students/ams-scholarships-and-fellowships/ams-freshman-undergraduate-scholarship/>
- This is the AMS Minority Scholarship for freshmen, which also closes in February. <https://www.ametsoc.org/index.cfm/ams/information-for/students/ams-scholarships-and-fellowships/ams-minority-scholarships/>
- The NC A&T University Honors Program accepts applications for fall admissions from May 1st through July 1st. As we discussed I was part of the Honors Program community when I first came to A&T and I highly recommend it for a variety of reasons if you choose A&T. <https://www.ncat.edu/academics/honors/current-students.html>
- Further down the road, this is the National Weather Association Foundation David Sankey Minority Scholarship in Meteorology for undergraduate sophomores and above studying meteorology, atmospheric science or above. There are other, typically larger scholarships available for upperclassmen as well. <https://nwas.org/scholarship-grants/nwa-david-sankey-minority-scholarship-meteorology/>
